

## **MUNICIPALITY BRINGS SERVICES ON THE DOORSTEP**

**REBONE:** The Mogalakwena Local Municipality Mayor, His Worship Cllr Ngoako Tauetsoala along with the Municipal Manager Motengo Morris Maluleke and dedicated officials have this morning paid a special visit to Rebone Township and Satellite offices. They brought with them important information about the Debt Relief-Incentive Schemes, the importance of revamping the Satellite offices and paying for basic services which will be rendered by the municipality at the Satellite offices.

Other municipal officials from various departments who were at Rebone were attending to sewer spillages, patching potholes, clearing of illegal dumping sites, repairing of highmast lights, fixing of the cemetery fence, cleaning of stormwater control and drainage system, grading and blading of access roads to the cemetery and taxi routes and etc ensuring that basic services are readily available. It's time to bring convenience and progress to their doorstep. On Friday, 10 November, Mayor Tauetsoala joined by Councillors, Managers and municipal officials will be distributing Wheelie Bins to registered members of Rebone community.

These bins are designed to enhance waste management and promote a cleaner, healthier environment for all. The anticipated date for the official launch of the Rebone Satellite office which be named Rebone Regional Service Delivery Area is the 1st December 2023. This groundbreaking initiative aims to replicate the success of the entire Mogalakwena Local Municipality right here in Rebone.

The Municipality's mission is to ensure that essential services are just a stone's throw away from Rebone residents. Currently there is a waste collection truck which has been dedicated to Rebone township, after official launch of the SDA the municipality will dedicate a water tanker truck, grader, TLB etc.
