### 3. The Energy Regulator further directs as follows:

- 3.1 The municipality to submit a report accounting for all the costs that have been noted in its COS study, to enable the Regulator to perform its independent verification process by 30 September 2025.

- 3.2 All cost information submitted by the municipality will be subject to an independent verification and may be clawed back upon receipt of audited financial figures by the Regulator by 30 September 2025.
- 3.3 The municipality must provide NERSA with a Specific, Measurable, Achievable, Realistic and Time-bound (S-M-A-R-T) energy losses reduction plan, which will ensure that energy losses are reduced to acceptable levels (below 12%). An appropriate budget with clear timelines needs to be allocated and spent in support of this. The implementation of this strategic plan, together with its budget must be monitored on a quarterly basis and reported to NERSA commencing 30 September 2025.
4. Please note that in terms of the National Energy Regulator Act, 2004 (Act No. 40 of 2004), National Energy Regulator is entrusted to perform all the functions that the National Electricity Regulator used to perform, and amongst others, to review and approve tariff increase proposals by all licensed distributors of electricity in South Africa. Implementation of tariffs without approval of the Energy Regulator is a contravention of the license conditions issued to you.
5. It is therefore important that provision is made in your planning / budgeting cycle to allow time for the submission of applications for future changes or increases to NERSA for consideration. NERSA further requests that you submit your budgetary timelines for purposes of our planning.
6. Should you have any enquiries please do not hesitate to contact Mr. Rhulani Mathebula in the Electricity Pricing and Tariffs Department on (012) 401 4616 or email: [Rhulani.Mathebula@nersa.org.za](mailto:Rhulani.Mathebula@nersa.org.za).

Yours sincerely

*pp T Nomalo*
